

HERE ARE ALL THE SUPPLIES YOU NEED TO

MAKE A CLOTHESPIN AIRPLANE!

SUPPLIES:

- **Supplies NOT included in the baggie:**
 - **Green & black crayons or markers**
 - **Scissors**
 - **White school glue**
 - **Hot glue gun (optional)**
- **Supplies included in the baggie:**
 - **Foam craft sticks**
 - **clothespin**

DIRECTIONS:

1. A video tutorial for this craft can be found following this link:
<https://tinyurl.com/y7td4uzr>
2. Cut the foam craft sticks into wings. Cut two larger wings for the front and a smaller one for the back. Below is a picture that shows how to cut the front and back wing.

3. Using white school glue, glue the two large wings onto the "handles" of the clothespin. One piece is glued on the top handle and the other is glued to the bottom handle.
4. Glue your back wing on the pinchy part of the clothespin.
5. Glue the fin onto the back wing. If you happen to have a hot glue gun at home, that would work well for gluing on the fin. Have an adult do the gluing with the hot glue gun.
6. Once your wings are dry your airplane is ready to fly!
